Minorities assessed

Kevin A. Curtin
co-news editor

The conditions of black students on the UMSL campus and an endorsement of state House Bill 834 highlighted the monthly University Senate meeting held Feb. 22 in Room 126 of the J.C. Penney Building.

The Senate heard several reports by various committees assessing the conditions of black students here. Vice Chancellor for Academic Affairs Arthur C. MacKinney asked Lois VanderWaerd, Affirmative Action officer, to detail the amount of black student and faculty representation on campus.

VanderWaerd said that the students' perception is that UMSL doesn't have enough black faculty members. "I don't know what the students' expectations are exactly, and I don't know what they consider to be adequate. I do know that our student representation is about 12 per-

cent. The faculty representation is substantially below that.

"If the students believe that we ought to have black faculty commensurate with representation of black students," she said, "I think that is unrealistic. I don't think that I'll see it in my lifetime."

VanderWaerd also said that the availability of black faculty is related to this problem. "For example, for all positions that we filled last year, 12 of them were in mathematics," she said. "The availability of black mathematicians in general math is 1.9 percent, and, between 1979 and 1981, there were 2,185 doctorates granted in general mathematics. Forty-one of them went to blacks."

VanderWaerd added that in other areas of mathematics, the black representation was even lower than this. In the sciences, the potential availability for black representation was between 1.7 and 2 percent.

"These are all very small num-

bers and we are in a very competitive world as far as attracting black faculty members to our campus," VanderWaerd said.

She added that between 1979 and 1982, UMSL had 3,686 applicants for faculty positions — 184 of these were black. During those three years 160 faculty members were hired, and eight offers were made to blacks.

"That's an offer rate of five percent," VanderWaerd said. "There were six hires for an actual hire rate of 3.8 percent. Statistically, that's about where we ought to be. That does not mean that I think we shouldn't hire more black faculty. I think we should."

The six hires break down into one hire for administration, two hires for the Center for Academic Development and three hires for the library. Offers in the School of Nursing and the political science department were

TROPICAL THOUGHTS: A student takes advantage of the balmy breezes the area enjoyed last week. Temperatures were in the high 60s.

Student Association budget request rises

Barb DePalma
co-news editor

The Student Association held its first meeting of 1983 last Sunday in Room 222 of the J.C. Penney Building.

One of the main points of discussion in the meeting was the request that \$18,462 be put into the student escort program for 1983-4. The money for the program was asked for as part of the Student Association's 1983 budget request.

Larry Wines, Student Association president, said that the \$18,000 would be used to run the escort program for two semesters and the summer. The summer student escort program would consist of six escorts working on both the North and South (Marillac) campuses for three hours a day throughout the 12-week session. The escorts would be available four days a week, since UMSL operates on a shortened work week during the summer session. Wines said \$3,464 would be needed to run the service for the summer semes-

ter.

Presently, the student escort program is run by the UMSL police and is funded from \$7,500 given by the Student Association.

"Unless we continue providing money, the service won't be there," Wines said.

Earl Swift, Student Association vice president, said that he hopes that an alternate method for funding the program will be used in the future. "We are not forever bound to finance the program," Swift said. "I would like to see the chief (William G. Karabas, UMSL police chief) get a budgetary increase. If the chief obtains another source of money, our funds will return to Student Activities."

Swift said that the escort service is necessary during the summer session for two reasons: (1) during the summer, there are fewer people on campus; and (2) crime increases in warm weather.

"I would be inclined to think that the service is cost-effective as long as it works," Swift said. "If it helps reduce attacks on

campus, then I think it is worth every penny we spent on it."

The assembly voted to ratify six bylaw changes which already had received a two-thirds majority passage in previous meetings. Although the bylaws already had been approved, an official hand count was needed to show passage.

The motion to ratify the bylaw changes was met with some strong opposition from members of the assembly. A heated exchange took place between Wines and Roland Lettner, Student Assembly parliamentarian, before the vote was taken.

The assembly also approved a sixth parking committee recommendation which was presented by Swift. The recommendation suggests that the assembly call for a restriction on interest earned on parking funds invested, so that interest dividends be channeled back into the Parking Improvements Account.

A linearization of parking fees to \$2 per credit hour up to a maximum payment of \$28 for full-

time students, has been recommended by John P. Perry, vice chancellor of Administrative Services. The Student Association has submitted a counter-recommendation which would linearize the parking fee at \$1.35 per credit hour to a maximum

payment of \$18.90 for a full-time student. The fees would be linearized on a 14 credit hour basis.

Swift said that it has been estimated that UMSL will lose

See "Assembly," page 2

Enrollment drops — again

Sue Reil
assistant news editor

The official 1983 winter semester enrollment has dropped sharply, according to Mimi LaMarca, acting director of Admissions.

The total number of students enrolled at UMSL this semester is 10,707. Compared to last winter this is a decrease of 697 students or 6.1 percent. This figure has dropped even more sharply from the 1982 Fall semester with 1,040 students or 8.9 percent.

"This is the greatest decrease I have ever seen," LaMarca said.

The highest enrollment in the history of UMSL was during the fall of 1981 with a total of 12,048 students.

"I think the greatest single factor contributing to the decline in enrollment is the economy,"

LaMarca said.

Actually there are two situations combined together that are affecting the enrollment, according to LaMarca. The economy is down but also there are fewer students applying to UMSL. LaMarca explained that there are 16,000 high school seniors in the St. Louis area, all of whom do not go on to college.

She said that a greater number of students are dropping out for a semester to work or transfer to another school to finish their education.

"I know that all three community colleges are up in enrollment," LaMarca said. UMSL is sending more transcripts to the community colleges, LaMarca said.

"I think we'll continue to see a decrease for a while in enrollment," LaMarca said.

Men must register with Feds before filling out financial aid applications

Daniel J. Johnson
reporter

A new law goes into effect July 1, requiring men to prove they have registered for the military draft before they can get financial aid, said Phil Rokicki, University of Missouri director of student financial aid.

President Ronald Reagan signed legislation in September that was passed by Congress making draft registration a requirement for students to get aid from any U.S. Department of Education program.

Men born after Dec. 31, 1959, must provide the university with copies of their Selective Service registration acknowledgement letters when applying for any type of federal aid, Rokicki said.

Federal aid includes Guaranteed Student Loans, auxiliary loans, National Direct Student Loans, Pell Grants, supplemental grants, college work-study assistance, Missouri Student Grants and some federally funded fellowships, he said.

Mark Nugent, UMSL director of financial aid, said male and female students will have to submit statements of registration compliance, indicating why they have not registered, for example, because of their age, they are female or they are on active duty.

"The required statement of registration compliance will enable us to proceed with the awarding of aid process," Nugent said.

Nugent stressed that students should "hang on" to their acknowledgement letters, because they will be needed for verification of registration, before a student can get aid.

Men who have lost their letters can obtain another copy from the Selective Service, Rokicki said. "By law, it should only take two weeks," he said, "but the Selective Service is taking significantly longer than two weeks." It will take several months for men to obtain replacement copies.

Handicapped students and conscientious objectors must register, Nugent said. "No student is exempt. There is no draft. It would take an act of Congress to reinstate the draft."

THANK YOU: Howard Jacob of Intel Corp. presents a new computer to Dr. Jerrold Siegel of the UMSL math department as Vice Chancellor for Academic Affairs Arthur C. MacKinney (far right) and Lewis Burns (far left) look on.

Rich Podhorn

Math department gets computer from Intel Corporation

Iris D. Fletcher
reporter

A gift of \$134,000 was donated to the UMSL math department by Intel Corp., a subsidiary of the International Telephone and Telegraph Co. The \$134,000 were given in the form of computers for instructional purposes and to increase the students' learning about the high technology of the computer world.

The Intel 432 computer was given to the math department at a ceremony Feb. 16. The ceremony was held in the math department's computer terminal room where UMSL math professors presented a plaque of appreciation to Intel.

Following the ceremony, a reception was held in the Summit lounge. Attending the ceremony were Carol Ellerman, administrative associate of University Relations; William Heinbecker, director of the UMSL Computer Center; Thomas M. Jones, associate dean of Arts and Sciences; four representatives from the Intel Corp.; several UMSL math students; and members of the math department and administration.

The computers will be located in one of the department computer rooms. The department is located at 500 Clark Hall.

UMSL professors and students are among the first to use the Intel 432 computer because it is new and highly technical, serving the purpose of preparing students for the future job market.

The Intel 432 is one of Intel's most sophisticated computers used by UMSL professors and

students. "It is the highest level of microcomputers on the market," said Jim Fleck, a technical employee at Intel. It rests on a desk and transmits computer language into a connected terminal.

Jerrold Siegel, a professor of mathematics, said that the computers will be used by junior and senior students and professors at UMSL. "They are the ones who know the computer language needed to operate the Intel 432," Siegel said.

Siegel said that an assembler computer language is used to operate this computer. "To learn the language, if you are a student, one must study a series of computer science and some math courses," Siegel said. Siegel added that the computer is too sophisticated for the student who has never learned the computer language. He said that the computer is here for the purpose of the students' learning. But the students must know and understand the computer language necessary to carefully operate the Intel 432 computer.

Siegel said that the Intel 432 computer is new to the math department. "We are working with the students in learning how to use this new computer," Siegel said.

When asked what the math department will do with the computers already in use, Siegel said, "We have been using an IBM Series I and a microfilm computer. These computers serve the purpose of instructing students. The students can enhance their knowledge and skills while working on the Intel 432 computer. We want to prepare our students for the future market."

New budget process launched

Kevin A. Curtin
co-news editor

The Student Activities Budget Committee has introduced a new budget request procedure to all student organizations who are seeking funds for the 1983-84 school year.

The new process includes a training workshop on how to make a budget request, new request forms that separate a budget into specific terms, and a screening committee that reviews all requests before sending the budgets to the Student Activities Budget Committee for final approval.

Dan Wallace, assistant dean of Student Affairs, said that the new process will provide better organization and more concise information and will be less time-consuming.

"The allocation process will now be more professional, more consistent, and also more equitable," Wallace said. "We found that the old formats were vague and that some student projects

were being left out. Before, it was hard to know what was in each request. Now we know exact amounts for specific projects."

The new budget requests for 1983-84 already have been submitted to the Office of Student Affairs and are awaiting review by the screening committee. That committee meets Feb. 22 through 25.

Wallace said that the new format also allows the budget committee to outline priorities, programs, services or activities that it would like to see happen during the year.

"It's not like the committee will tell organizations what to do with their money," Wallace said. "An organization will be funded even though it may not meet priorities. But this does allow organizations to interact with one another and each group can plan its budgets more carefully."

The new process replaces a system in which each organization submitted its budget in different forms and the budget committee met in a one-day

marathon session to hear about 30 requests.

"That was a hard way to work," Wallace said. "The committee would get tired and we found that there was a loss of efficiency."

The new process stems from a United Way workshop that Dean of Student Affairs Lowe S. MacLean invited to the UMSL campus during the fall of 1981. An analysis of the old method was done and methods were suggested to MacLean and the Student Association.

Student organizations now attend a workshop in which they are given the materials necessary for making a budget request and are taught how to use them. The groups also learn all policies and procedures and are given three weeks to draw up a budget.

The new forms are specific. They ask each organization to define its goals and the amount of

See "Budget," page 6

Assembly

from page 1

approximately \$50,000 for every quarter the parking fee is reduced. He added that UMSL presently receives \$50,000 each year in interest from parking fee revenue, but the interest money is channeled into the general revenue fund and not back into the parking fund.

Swift said the ad hoc committee on parking, appointed by Chancellor Arnold B. Grobman last December, would continue to push to get the parking fee lowered to \$1.75 per credit hour. He said that the fact that UMSL is losing money every quarter the fee is lowered might help the committee's fight to get the fee lowered.

The Student Association budget for 1983-84 was presented to the assembly for approval. The assembly passed the budget request which calls for an increase of \$20,612 over last year. Some of the larger increases were shown in the areas of consumable supplies, salary and wages, the escort service, a 20th anniversary display and a 20th anniversary reunion and dinner for past student government leaders.

Wines said the increase from \$10,200 to \$16,700 in wage and payroll was requested because of the hiring of a secretary over two semesters and the increase in the hours worked by the secretary. The association also requested \$500 for a display which

would be part of UMSL's 20th anniversary celebration in the fall of 1983. The display would show UMSL students' contributions to the community. It would remain on campus for 30 weeks and tour the community the rest of the year.

The association requested \$855 to hold a reunion and dinner for UMSL student leaders over the past 20 years. An increase from \$316.50 to \$1,218.51 also was requested in consumable supplies for 1983-84. Wines said this increase was necessary because of the increased use of advertisements in the Current as opposed to the printing and distribution of flyers. It also would cover materials and office supplies.

Nine members were approved by the assembly to the University Program Board. They are Carol Aft, Clifford Reeves, Bob Kent, Jackie Poor, Larry Wines, Joe Lamb, Terry Inman, Linda Brandecke and David Jayne.

Bob Wittman, Larry Wines and Randy Gehricke also were appointed to the University Center Board.

Seven students were appointed to the Student Foundation committee. They are Clifford Reeves, Earl Swift, N. Alan Wilson, Carol Line Oakley, Rodney Woods, Bob Wittman and Pat Kinamore.

The next Student Association meeting will be held March 13.

WE'LL PAY YOU TO GET INTO SHAPE THIS SUMMER.

If you have at least two years of college left, you can spend six weeks at our Army ROTC Basic Camp this summer and earn approximately \$600.

And if you qualify, you can enter the ROTC 2-Year Program this fall and receive up to \$1,000 a year.

But the big payoff happens on graduation day. That's when you receive an officer's commission.

So get your body in shape (not to mention your bank account).

Enroll in Army ROTC. For more information, contact your Professor of Military Science.

ARMY ROTC. BE ALL YOU CAN BE.

New development director begins duties

Barb DePalma
co-news editor

Walter M. Hundley has been appointed the new director of development at UMSL, effective Feb. 7.

Hundley replaces Daniel J. Sullivan who left UMSL last fall to become a special assistant of development to University of Missouri President James C. Olson.

Hundley said his main goal is to increase the income from private gifts from all sources to the university. His main area of emphasis will be in achieving support from corporations and foundations.

"The annual giving to UMSL should be double over what it has been," he said. "However, UMSL

has made remarkable growth in recent years."

Hundley said that UMSL has not kept pace with other universities in terms of how much they received in private contributions. He attributes this to the fact that UMSL is only 20 years old and, therefore, does not have as many older alumni as does the University of Missouri-Columbia or Washington University.

"My job is to make other people in corporations and foundations see that a state university can't operate solely on legislative appropriations," Hundley said. "There are always needs over and above the budget."

Hundley says that he brings a

"unique experience" to this job because, for the past 20 years, he has been involved in development and fund-raising for pri-

Walter M. Hundley

vate universities and colleges. He was involved in fund-raising and development for three years at Washington University and for 10 years at Rollins College in Winter Park, Fla. He came to UMSL after serving as director of development for the Lindenwood Colleges in St. Charles.

Hundley studied at UMC, but transferred to Washington University where he received his bachelor's degree in business administration in 1951.

Another area Hundley plans to concentrate in is planned or deferred giving. Gifts in this area usually include real estate and stocks.

"Part of my job is to appeal to our constituents that have the ability to give to the university in terms of wills and estate plan-

ning," Hundley said. "Presently UMSL doesn't receive anything in deferred giving."

He said that it is important that he keep in contact with area trust firms to make sure they are aware that UMSL is open and ready for anyone who wants to donate something.

There are two plans that are used in deferred giving, Hundley said. They are gift annuity and a pooled income fund. Gift annuity is where the prospective donor receives a guaranteed income for life, after the gift is received. In a pooled income fund, the title to a stock certificate is given to the university to invest and get the best possible return. The donor then receives an income from the interest received by the university. After the donor dies, the university receives control of the title and can spend the interest in any way it wants.

See "Hundley," page 6

Service

from page 1

"All you're doing is registering to say 'Here I am, here's where I live, here's my birthday,'" Rokicki said.

Rokicki said that students turning 18 should register as soon as possible. They have 30 days before and after their 18th birthday in which to do so.

"Institutions are put, unfortunately, in the position of enacting the Selective Service law to provide funds," Rokicki said.

Men may register at their local post offices.

Newman House to hold games

The Newman House, UMSL's Catholic student center, is sponsoring "Table Game Nite" Friday, Feb. 25, at 8 p.m.

"This is something entirely new at Newman House," said Nick Wagner, associate campus minister.

Games such as Monopoly, Scrabble and cards will be played. Wagner also invites students to bring their favorite games.

Newman House is located at 8200 Natural Bridge. For more information, call Wagner at 385-3455.

PI SIGMA EPSILON PRESENTS SPRING BREAK IN DAYTONA BEACH

MARCH 18 - 27, 1983

Arrangements by
ECHO TRAVEL, INC.
MC152571F

SIX PER ROOM

\$193

FOUR PER ROOM

\$205

TRIP INCLUDES

- Round trip motor coach transportation via modern highway coaches to Daytona Beach, Florida leaving Friday, March 18.
- Seven nights accommodations at the exciting Texan Motel of Daytona Beach. Located at 701 South Atlantic Ave., it is one of the most demanded hotels on the strip at that time.
- A truly great schedule of activities including our famous pool deck parties and belly flop contest.
- Optional excursions available to Disney World, Epcot, and several other attractions.
- Numerous bar and restaurant discounts.
- The services of full time travel representatives.
- All taxes and gratuities.
- Guaranteed kitchenette or oceanfront available at small additional charge. (4 per room only)

A QUALITY TRIP - A LOW PRICE - A GREAT TIME

The Texan Motel, located right in the central area of the strip, is definitely the place to be during spring break. The hotel has a pool, big party deck, restaurant, a great bar, color TV, air conditioned rooms and plenty of activities. Pictures are available where you sign up. Our motor coaches are nothing but the highest quality highway coaches. We also give you more extras with our trip than anyone else. Don't blow it and go on a lower quality trip. **LAST YEAR OVER 8,000 PEOPLE ENJOYED THIS TRIP.**

Programming

Wines must not dictate changes

Changes are not always for the best, especially when one ignores proper channels and guidelines to make them. Unfortunately, Student Association President Larry Wines believes this is the way things should be done.

Wines has taken it upon himself to insure students have control over one of the largest groups on campus, the University Program Board. He has decided to insert Student Association into the name of the program board, make the program board a standing committee of Student Association and include programming's budget with Student Association's.

Little does Wines realize that it is not within his power to make such decisions. Changes in the program board must be authorized by the Office of the Dean of Student Affairs, and as of yet, the dean has not authorized those decisions. Hopefully, he never will.

Student Assembly, UMSL's student government, already appoints all of programming's board members. For a political group to have more control over a group that specializes in the arts is ethically wrong. Programming needs to be completely autonomous and free of political pressure to insure its freedom of expression.

To clarify matters, here is a brief sketch of the history of programming at UMSL:

The program board was established in 1970 under the direction of Stephanie Kreis, director of programming, until Curt Watts became adviser to the program board in 1980. The board was organized by the Office of Student Affairs and Connie Kimbo, former dean.

For the first few years of programming's existence, Kreis appointed all the members to the board. Then in 1976, it was agreed that half the members were to be appointed by Kreis and the other half by student government.

In 1979, just before Kimbo resigned as dean of student affairs, Kimbo decided to give Central Council (UMSL's student government at the time) complete responsibility in appointing the board members.

In the past year, the board has been expanded from nine to 15 members. The entire organization consists of approximately 60 students who serve on such subcommittees as lectures, films, fine arts and video. Watts, in his third year with the board, is now recognized as the coordinator of Student Activities and serves as an overseer of programming's operation.

Under Watts' guidance, the organization has operated efficiently. Students who are new to the organization are given an opportunity to participate directly in the group's activities, which gives them the experience to accept more important roles in the future.

If Wines is allowed to make changes without approval from the dean's office, though, the future of programming is in jeopardy. With a free rein, Wines and his successors could censor programming any way they see fit. They would even be able to cut the budget in half if they wanted to.

When Wines delivered his changes to the program board in January, he encountered heavy resistance. The program board members, satisfied with the organization's present setup, are opposed to Wines on this issue. It's to their credit that they're willing to stand up for what they think is a blatant abuse of the system.

Thanks to Wines' backdoor tactics, the program board has two chairmen, one appointed by programming and the other by Student Association. It's interesting, and somewhat fitting, that the Student Association-elected chairman Cedric R. Anderson is vehemently opposed to

Wines' changes. He believes the last thing programming needs is to be tied to Student Association.

His point is well taken. A similar circumstance temporarily destroyed the programming organization at St. Louis University three years ago when students were given complete control. Just recently, the Student Activities office was reinstated at SLU and programming there is making a slow comeback.

Wines pulled a fast one at Student Association's most recent meeting when he appointed himself to the program board. That move must be questioned, especially since Wines has no experience whatsoever in programming at UMSL. There certainly must have been others who were more qualified, but who didn't get appointed.

Wines' motives for his changes are hard to figure. He feels strongly about student control in groups that are funded by

students. But programming is run almost entirely by students under its present system; Watts is only there to make sure certain policies are not violated.

It should also be mentioned that programming is a more stable organization than student government. With a budget that hovers around \$100,000 a year, an administrator such as Watts is a necessity. Student Association could possibly be able to manage such a large budget, but why take the chance when things are fine as they are?

In short, programming may require some changes in the future. But Wines' changes are definitely out of the question.

Student Patrol should stress quality, not quantity

Hooray! Student Patrol members of the Student Escort Program have stopped ticketing cars. It's a shame they had to replace that ridiculous duty with one that is almost as absurd.

Student Patrol members now leave notices on cars with unlocked doors or valuables that have been left unguarded in an effort to make students more aware of potential theft situations. Although the intention is good, the Student Patrol's new responsibility is an open invitation to trouble.

First, the Student Patrol is doing students a favor by locking their car doors if they were left unlocked by accident. But, for whatever reason, there are some students who keep their car doors unlock-

ed on purpose. For someone to be authorized to go into our cars without permission is not right.

Also, leaving notices on the windshields of cars is a dangerous practice. Not only does it let the owner of the car know he or she left something valuable in the car, it lets everyone else know this, too. Consequently, potential criminals wouldn't have to look quite as hard to find a car with valuables just waiting to be ripped off.

Since this part of the program is more trouble than it's worth, the best solution would be to scrap it. If UMSL Police and the Student Patrol want students to be aware of their carelessness, they might consider putting notices on every car.

It seems the Student Patrol is more con-

cerned about finding things that will keep them busy than improving the service they were funded to provide—escort students. The service, under its present setup, has its fine points. But, considering thousands of dollars have been poured into the program, it has a long way to go before it meets the students' needs.

The program, which was funded by \$7,500 of Student Activities money through Student Association, has not provided the kind of service students expected. UMSL's police department has devised a system where Student Patrol members work in shifts during the day and at night, escorting students to parking lots upon request. But Student Patrol members are not needed to escort students dur-

ing the day; their primary service is at night.

Instead of Student Patrol members lurking around the campus during the day, looking for things to do, they would much better serve the students by doubling up at night. More Student Patrol members working at night would make the program more visible, and decrease the possibility of students having to call the police department to send an escort. Students who don't know that they can get an escort by calling the police probably won't bother to use the service.

Since students are funding this program, they should determine what needs to be done. If the UMSL police department is going to continue to make all the decisions based on their needs, then let's have the program funded by the same fund (parking) that pays the salaries of the UMSL police officers.

Director of University Police William G. Karabas has put forth a lot of effort in anti-crime programs on campus. His enthusiasm in establishing programs that should prevent crime on campus is great for the UMSL community.

As far as the Student Escort Program is concerned, though, less emphasis should be placed on the quantity of services the program provides. Instead, let's worry about improving the quality of the service itself.

Correction

In last week's editorial, "UMSL: It's not just for classes anymore," we inadvertently referred to an upcoming election that traditionally has had poor representation as being for student government. In actuality, we were referring to the University Senate student elections, which tentatively have been scheduled for March 7 and 8. The Current regrets this error.

letters

Defends recent actions of vocal Poly-Sci professor

Dear Editor:

I feel compelled to respond to the hysterical, libelous, fascist attacks against the good name of Associate Professor Joyce Mushaben that have filled the Current letters pages in recent weeks. Having known Joyce since the start of her career here at UMSL, I can attest to the fact that without a doubt, she is the finest professor in the UMSL political science department. She is calm, honest and rational and therefore could not possibly have behaved in the manner suggested by Mr. Bernard J. Backer.

Nevertheless, Joyce has earned the ire of the campus reactionaries simply because of some of her most noble beliefs. She has dared to criticize the capitalist economic system and its related evils. She refrains from spewing forth the normative pro-American and anti-Communist platitudes. She emphasizes the necessity of an ordered economy, as opposed to the American system of organized plunder, in

which few live in luxury while the many starve.

As all reasonable people admit, a rapprochement between the U.S.A. and the U.S.S.R. is not only inevitable, it is also quite desirable; gun-boat diplomacy is no longer practical in the Nuclear Age. Warfare of any kind is inherently destructive and inordinately expensive in a world in which human needs still come second to corporate greed.

The absurdity of any war, except justifiable defensive operations against fascist aggressors, becomes readily apparent when it is conceded that the relatively minor differences between illogically distinct geographic entities can never be worth the ultimate evil of military violence as a means of conflict resolution.

There is no reason to believe that the Soviets would not compromise with the Americans regarding nuclear and non-nuclear weapons if the Americans would first agree to withdraw their own military and espionage forces from Europe, El Salvador, etc. And the Soviets would stop arming the front line forces of the Third World peoples' liberation armies if American financiers, spies and military "advisers" would stop propping up so many corrupt dictatorships.

But Backer and his kind pretend not to notice such things. They would risk a nuclear war to destroy the economic democracy of the U.S.S.R. They would permanently depopulate the earth, rendering it forever uninhabitable, rather than make needed changes in the racist, fascist social structure of the U.S.A.

Name withheld upon request

Thank writer

Dear Editor:

The members of the UMSL hockey team would like to thank Bob Chitwood of the Current staff for his continuing interest and support of the UMSL hockey team. Bob's constant interest in the first year of UMSL's hockey program has helped the team to the successful season it has attained.

Thanks very much,
Members of UMSL hockey team

Disputes claim that CFA film was 'intellectual midgetry'

Dear Editor:

In last week's edition of the Current, a member of the UMSL community who lacked the courage to sign his or her own name to a Letter to the Editor charged that the film "Countdown for America" was a "dangerous exercise in intellectual midgetry." Surely, U.S. unilateral disarmament and the unparalleled Soviet military buildup are factual knowledge. The only case of "intellectual midgetry" involved in this film was the failure to expose the ideological foundations of the majority of freeze promoters.

Freezeniks, for the majority, have no ideological or practical commitment to the defense of "individual freedom" because they are socialists. Every student of left-wing politics is familiar with the "no enemies on the Left" comradeship of liberals, socialists and Marxists. Remember the "Popular Front" — it's alive and well today. Underlying the "moral superiority" of those who want to end the arms race by a freeze is a commitment to convergence of the United States and the Soviet Union. Never mind that Western and Marxist concepts of freedom are

completely divergent, which should dictate constant strains in relations. The Freezeniks actually desire a middle ground of socialism upon which the two superpowers can converge. Since the Soviet Union is the "motherland" of international socialism, it is only natural that it should dominate any such future convergence.

Socialism may fill a void for many morally insecure persons in the West, but it clearly entails a sacrifice of human freedoms for varying degrees of state absolutism. To a socialist, it is acceptable that everyone but the party elites live in poverty, because then we, the faceless masses, will all be equal. Such humanitarian "logic" based on anti-individualism is contrary to Judeo-Christian theology. For this reason it is very disturbing to see so many religious activists endorsing what amounts to acceptance of common world slavery to totalitarian statism.

Respectfully yours,
Robert J. Wittman
president, Progressive Conservatives

Says clever use of language borders on communism

Dear Editor:

The Liberal-Left coalition has subtly influenced American opinion over the years by a clever but arrogant use of the English language. Quotas and preferential hiring are termed "affirmative action," implying that those Americans who support a non-statist form of assuring equal opportunity are somehow promoting "negative action" by which one assumes they mean repression. Tax increases are called "revenue enhancement" and losses of tax revenue from tax exemptions are labeled "tax expenditures"; cuts in the rate of growth of government spending are titled "retrenchment process." Notice how all of these terms convey an emotional and divisive sense when they are read without critical insight.

As bad as this abuse of our intellects is, the icing on the cake has to be the monopolization of the word "peace" by disarmament advocates. The association of "peace" and "disarmament" implies that anyone who supports a stronger military somehow endorses war. This, of course, is utter nonsense. Yet the continued acquiescence of journalists in labeling all pacifist movements and groups as "peace" movements serves only to redefine the English language in much the way that Communist dialectics envisioned.

Sincerely yours,
Dave Williams
member, Collegiate Anti-Communists

Letters policy

The Current welcomes all letters to the editor. All letters must be signed and the writer's student number and phone number must be included. Non-students also must sign their letters, but only need to add their phone number.

Names for published letters will be withheld upon request, but letters with which the writer's name is published will receive first preference.

Responsibility for letters to the editor belongs to the individual writer. The Current is not responsible for controversial material in the letters, but maintains the right to refuse publication of letters judged by the editorial staff to be in poor taste.

Letters may be dropped off at the Current offices, 1 Blue Metal Office Building, or the University Center Information Desk. They may also be mailed to Letters to the Editor, Current, 1 Blue Metal Office Building, 8001 Natural Bridge Road, St. Louis, Mo. 63121.

1983-1984 Season

Summer Children's Shows

**Only one of these pens
is thin enough
to draw the line below.**

The newest innovation in writing is the Pilot Precise rolling ball pen. It writes extra thin and extra smooth because of its micro ball and needle-like stainless steel collar. A unique pen at a uniquely affordable price. Only \$1.19.

Measles move through Midwest

Barb DePalma
co-news editor

UMSL students are being alerted of the possibility of a measles outbreak on campus, according to Yvonne Browning, a registered nurse in the UMSL Student Health Center.

The warning stems from a reported outbreak of measles on several Indiana university campuses including Purdue and Indiana State. Browning said she was contacted by Lewis Anderson from the St. Louis Health Department, who said that students at UMSL might be affected because several athletic teams will compete at Indiana universities.

Browning said that she contacted Chuck Smith, UMSL athletic director, to tell him of

the possible outbreak and told him to warn athletes and coaches of the symptoms of measles.

Smith said after he talked to Browning he passed the word on to his staff. He said that none of the winter sports teams had competed in Indiana, but that the women's softball team will be competing in Evansville, Ind., on March 21.

"What we will do is have the softball coach call Evansville," Smith said. "If there is an epidemic, we probably won't go."

The symptoms that students should be aware of are cold-like symptoms (low temperature, runny nose, aches and pains), and a blotchy red rash that originates on the head, neck or trunk and extends to the arms and legs. The rash usually is not raised, but is more of a discoloration of the

skin. Measles have an incubation period of 8 to 13 days and the rash usually appears on the fourth day of incubation.

"In days gone by, all kids were immunized," Browning said. "Lately people have been becoming slack in getting immunized. Not as many people today have shots." Browning said the severity of the outbreak is not known.

Students who have symptoms for measles are encouraged to go to the Student Health Center in 127 Woods Hall. A medical history will be taken and the student will be sent to Normandy Osteopathic Hospital or their private physician for observation.

For more information, contact Browning in the Student Health Center, or call 553-5671.

Teaching awards available

Faculty, staff, students and alumni are asked to submit nominations for the 1983 AMOCO Outstanding Teaching Awards by Monday, March 28.

The awards recognize excellence in undergraduate teaching, which is broadly defined to include advising and counseling as well as classroom performance. Innovations and research which foster good teaching also are seen as relevant.

Eligibility is limited to regular full-time faculty at the ranks of assistant professor, associate professor

and professor. Faculty members who have won the award in the past seven years are not eligible in 1983. Two awards, each carrying a \$1,000 prize, will be given.

Nominators should use the forms which have been distributed on campus. They also should attach a letter describing why the candidate is deserving of the award. All nominations must be submitted directly to Ruth Jenkins, chairwoman of the AMOCO Award Committee. She is located in Room 214 Education Office Building on the South (Marillac) campus.

Senate

from page 1

turned down. These are not tenure-track faculty, but they are members with academic appointments, VanderWaerd said. She added that there is a 6.7 percent potential for hiring black librarians.

Howard Benoist, director of the Center of Academic Development, suggested that the CAD work more closely with Lowe S. MacLean and the Office of Student Affairs. Benoist also plans to send a letter to all departments in the university asking them to discuss the CAD in their meetings to look for ways to incorporate the CAD into their activities.

He also said that "The CAD should be better integrated into the university committees and the senate itself." He urged that the CAD seek solutions for the small numbers of black student teaching assistants in the instructional laboratories.

"The small number of black teaching assistants has to do with the availability of blacks in student areas," Benoist said. "Our largest instructional lab is mathematics and we have to get students who are not majoring in mathematics but have at least a strong mathematical background."

Benoist said that the CAD is doing a good job despite an overload on its staff. He suggested that instead of hiring a new staff, the center should retrain some of its existing staff into advisory positions. This change might be put into effect by the fall of 1983, Benoist said.

Mimi LaMarca, acting director of admissions, said that her office has participated in "numerous activities with the goal of increasing our visibility in the admissions and financial aid components."

The Office of Student Financial Aid has held workshops for high school students and their parents to instruct them on how to file for financial aid. Informational ads have been run in local newspapers. Approximately 430 letters were sent to minority students about the opportunities available at UMSL, encouraging these students to file for admis-

sion. The Financial Aid office plans to send follow-up letters in the spring.

MacLean said that three suggestions have been made to his office: (1) increase the minority student orientation program, (2) increase multicultural extra-curricular activities, and (3) hire a black counselor.

MacLean said that the most dramatic increase in black representation was in the Student Activities Budget Committee.

"In 1981-82, the budget committee awarded \$4,298 to the Association for Black Collegians," he said. "In 1982-83, they received \$11,848. This enabled ABC to move from a Black Culture Week in 1982 to a Black Culture Month in 1983."

University Senate chairman James Doyle also told the senators that he had been contacted by state Rep. Robert Holden of Springfield. Holden was seeking a faculty endorse-

ment of House Bill 834.

This bill would restructure the present curator selection process for the entire UM system. Presently, the governor appoints new members to the UM Board of Curators. If H.B. 834 passes, a committee of four faculty members and four students from the UM system, along with eight private citizens, would draw up a list of names from which the governor must choose each new curator.

The students and faculty members for this committee would be chosen by elections held on each campus. Each campus would then send one faculty member and one student to the committee.

The private citizens would be chosen by the governor.

The University Senate decided to endorse the bill in principle only. It will withhold its full endorsement until a final draft of the bill can be read before the entire group.

Hundley

from page 3

Other areas of giving Hundley will be concerned with are friends and individuals, faculty and staff members, campus organizations and alumni.

"Alumni are the best source of private gift income," he said. "However, it has been a low source of revenue for us (UMSL)."

Hundley said he will work directly with the new alumni development director, David Arns, to "zero in on alumni." He added that the UMSL Alumni Association is planning a phoneathon sometime in March to raise money for the university. He said that past phoneathons at UMSL have been very successful.

In his dealings with corporations and foundations, Hundley plans to target his efforts to 1,500 corporations which have 100 or more employees. He said these include McDonnell Douglas Corp., Emerson Electric Co., Anheuser Busch Co., Inc. and Southwestern Bell Telephone

Co.

"There was no concentrated effort in the past to solicit major gifts from corporations," Hundley said. "Some faculty members, however, have solicited relatively modest gifts for specific projects."

Hundley said his job requires both personal and direct mail on his part and that of his staff. He said he has a support staff under the University Relations department and a part-time staff member whose responsibility is to gather information and data on corporations and foundations and their members.

"I like to be knowledgeable about things before I go in," he said. "The image of the university is vitally important in my efforts so we can properly communicate with our constituents to provide them with the positive impression that UMSL has in the community."

He said that he is excited about the challenges and opportunities

he will face at UMSL. "One of the largest tasks in my job is to educate our constituents and convince them as to why a public institution needs private gifts," he said.

Wallace added that the new budgeting process will undergo an evaluation after the allocations have been made. New request forms might be introduced if needed, he said.

Spring Break in . . . SOUTH PADRE ISLAND

- * 8 days/7 nights deluxe condominium lodging (Sun Tide II — Two per sleeping area)
- * Welcome party with free refreshments
- * Full program of optional activities and events
- * All taxes and service charges

Sullivan secures MTB with smiles

Sharon Copeland
reporter

Keeping track of the comings and goings of about 1,000 people a day sounds like a hard job. But Francis X. Sullivan, the security guard in the Mark Twain Building, takes it all in stride.

How does he remember the faces of so many people? "It comes from my 32 years on the police force," Sullivan said. "I was trained to remember details about people. You never know when you'll be called to testify. It could be years later."

"People here hand me their I.D. card. I look at it and at them and remember something about them."

Sullivan came to UMSL 2½ years ago after retiring at the age of 56 from the St. Louis Police Department, District Three.

"At age 56 I knew I couldn't be out there chasing 16- and 17-year-olds anymore," he said. "I feel very fortunate to have this job and to be able to work with such a fine group of people as we have here in the Mark Twain Building."

"My main job," he said, "is to keep unauthorized people out of the building. If they get in here and get hurt, the university could be responsible. We're just trying to protect the people."

"And it isn't fair for our students when they are paying the fees, to let outsiders use the building for free."

Mike Larson, the women's basketball coach, agreed with that idea and then commented on Sullivan's ability to handle those outsiders.

"I've seen outsiders who try to sneak in and students who try to get a friend in free. They can

really raise a ruckus sometimes when Francis catches them. But he's quite good at handling them. He's firm, but gentle."

Bruce Clark, chairman for the department of physical education, also mentioned Sullivan's ability to handle people.

"He's very agreeable in crowd control and telling people who goes where," he said. "He's a big man and it helps if you tower over someone."

Clark also coordinates the Active Adult program which is a group of 138 people over age 55. They meet every Tuesday, Thursday and Saturday at the Mark Twain Building.

"Francis helps with the group by helping new people find their way, passing out cards and other information. He does everything very well," Clark said.

In addition, Sullivan helps students with those frustrating mistakes we've all made from time to time. "Lots of students lock their keys in their car," he said. "Or they leave their headlights on. I call the emergency police number for them. I also answer phone calls about when the building is open."

"There are 12 P.E. classes here during the day. I keep track of where they meet and if a class is moved to another location, I can tell the students. I'm a jack-of-all trades."

Sullivan spent many of his years on the police force hunting fugitives who had "jumped" bail. Once he found them, he had to get them extradited, if necessary, back to Missouri. Those years did not turn Sullivan into a cynical man. In fact, he's such an optimistic person, that he even saw good in some of the criminals he met.

Sharon Kuvatzky

LAID BACK: Francis Sullivan, security guard for the Mark Twain Building, says he enjoys his job. In addition to keeping unauthorized persons from the building, he also assists students, gives directions and helps with crowd control.

"Once we arrested a man for murder," he said. "He had knowledge of the murder, but his brother actually had committed the crime. The brother surrendered to me and took all of the blame. He was tried and convicted. He got 300 years. His brother was exonerated. Sometimes there is good even in criminals."

Many times, when Sullivan checks a student's I.D. card, he will recognize a last name. Then he will ask the student what their father's name is. Often it hap-

pens to be the name of a man with whom Sullivan went to the old McBride High School. "There were 800 boys at the school at the time I went there," he said.

As friendly as he is, Sullivan probably knew them all.

Chuck Smith, athletic director, is another Sullivan fan. "I'm in charge of all the athletic programs plus the whole facility here," he said. "Having a person like Francis working for me is a great relief. I can't be every-

where. With Francis on the job, I know the building is safe. He's a very conscientious employee."

Sullivan, with his helpful attitude and quick smile, has an important public relations role. He is the first person students, faculty and staff members and visitors meet when they enter the Mark Twain Building. The impression he makes on each person will stay with them. Fortunately for UMSL that impression is always positive.

Extension courses cater to special interests

Connie Fondren
reporter

Do you have a special interest you would like to pursue? Have you been told your job abilities are behind the moon? Are you fighting with yourself to find the right profession? The Continuing Education-Extension division at UMSL can be an answer to your problems.

Continuing Education-Extension offers a variety of programs and services, both credit and non-credit, which are taught by UMSL professors as well as experts in their specific fields of study. Non-credit courses usually are held at USML or as otherwise specified.

Listed in the non-credit section in the 1983 Winter/Spring Continuing Education-Extension pamphlet are courses ranging from "Archeology Without Digging" to "Writing for Children." Courses tend to lean toward the special interests of people. Other workshops that could satisfy the needs of just about anyone are Grammar, Homebuying, Music and Theatre, Photography and Video, Stock Marketing and Transportation.

Training programs also offered under the non-credit listing consist of the Discovery Program, Engineer-in-Training refresher courses, and improvements in small businesses and firms. There also are some non-credit courses that can help a person find a profession such as the hands on courses in computer

programming in BASIC and Pascal and other microcomputer courses, as well as nursing sessions and seminars in optometry.

Due to the fact that more non-credit courses are offered than credit courses, the non-credit courses seem to have a higher response. Non-credit courses don't really lean toward college students, but rather toward adults who work and have background knowledge in the courses offered, and also to those who want to renew old techniques or just learn new ones, explained David Klostermann, director of credit and non-credit courses. He added that lifelong learning has increased. "Learning usually ended after high school or college," Klostermann said. "Now people are being forced to continue their education."

"There has been a tremendous response in the non-credit programs because of the trend of going back to school," said Deborah Factory, senior education coordinator for non-credit course.

Factory said there are no set requirements for non-credit courses. "It offers an individual the opportunity to gain knowledge on any subject," she said.

"Non-credit courses are great for people who want to learn more but not attend college," said Linda Langston, a secretary at the Continuing Education-Extension Office.

Non-credit courses are not necessary for career extension,

but they are good for growth with fellow men, Vivian Nelson, another secretary at the Continuing Education-Extension Office explained.

"There has been a tremendous new social force placed on know-

ledge," Klostermann said. "More women and minorities are returning to education to change professions or just to begin a new career."

Nelson enrolled in two courses and said she found them interest-

ing. One, a course called "People, Pictures and Places," made available a historical background of Missouri with Kathy Corbitt as the speaker.

See "Classes," page 10

Various topics for the choosing

The following is a sampling of courses to be offered during the winter/spring session of continuing education classes. A complete listing of courses may be obtained from the Continuing Education office.

Brush-Up Study Skills — Methods to improve concentration, take notes, read and study more effectively, do better on tests and papers, and gain confidence will be taught in this class. Cost: \$25. Saturday, Aug. 20, 9 a.m. to 4 p.m.

Computer Camp for Kids — This course is an introduction to the computer for ages 11 to 15. Topics will include what computers are, what they do, and how to get started programming in BASIC. Cost: to be announced. Saturdays, March 19 to April 16, 9 a.m. to noon.

35mm Camera Techniques — Beginning students of photography can learn the basics in this course. Cost: \$69. Tuesdays, April 5 to May 10, 7 to 9 p.m.

Know the Score — Guest artists from the Saint Louis Symphony will give the "insider's view" as they demonstrate their instruments. The course is designed to increase understanding and enjoyment of symphonic music. Cost: \$60 per person, \$90 for two. Two sections, times vary.

Getting Ready: What to Do With the Rest of Your Life — Participants will learn to identify their desires, skills, and potential abilities in order to discover practical, rewarding options in education or the job market. Cost: \$25. Wednesdays, May 4 to 25, 7 to 9 p.m.

Advertising Workshops for Small Businesses — This course will focus on both preparation of an advertising plan and an actual layout and design of ads. Cost: \$45. Thursdays, March 3 and 10, 7 to 9:30 p.m.

Nature Photography Workshop — For both beginning

and experienced photographers, this course will cover the technical problems specific to nature photography, as well as helpful hints on the necessary equipment. Freelance photographer-writers Edward M. Mason and Lee Franz Mason teach the course. Cost: \$50 per person, \$80 for two. Wednesdays, April 6 to 20, May 4 to 11, 7 to 9 p.m.; Saturday, April 30, 10 a.m. to 3 p.m. (field site).

Listening Beyond the Words: Building Communication Skills — This course will explore the relationship of attitude to communication, problem areas, how to cause others to respond favorably, and communication characteristics that build self-image, perception and control. Cost: \$45. Mondays, March 7 to April 4, 7:30 to 9:30 p.m.

For more information on these or other continuing education classes, call 553-5961.

Morse studies the plight of homeless men

Debbie Suchart
reporter

In every city there is a group of forgotten people, people whose existence is not recognized most of the time. The term "homeless" may bring to mind many images—bag ladies, carefree wanderers, drunken bums—but few of us have ever taken the time to know a homeless person—to ask a homeless person what being homeless really means. Gary Morse, a clinical psychology graduate student at UMSL, has conducted research on the lives of homeless men.

Under the advisement of associate professor Bob Calsyn of the psychology department, Morse conducted surveys of 165 homeless men at the New Life Evangelistic Center in St. Louis in the spring and summer of 1981.

Morse had an opportunity to compare the stereotypes with the realities of homeless men. "I think there is a stereotype that homeless people choose this way of life sometimes because it fulfills some romantic ideals they have, but this idea does not fit the overwhelming majority," Morse said. "Most homeless men

are in a lot of pain and want to get out of the lifestyle."

Another stereotype that exists is the idea that homeless men are dangerous. "Certainly some crime exists among them," Morse said, "but the majority are victims rather than perpetrators of crime. About one-third have been beaten or mugged. They are easy prey," Morse said.

Homelessness usually was preceded by a number of serious life crisis—the loss of a spouse, an illness, a death in the family, or the loss of a job. Most homeless men in the survey had low levels of social support. Those with serious mental health problems had the fewest social supports.

"It is really striking how many of these men came from poverty backgrounds," Morse said. "It takes a lot less to become homeless when you are below the poverty line," he added.

The characteristics of the homeless men reveal both differences and similarities. The length of time that men were homeless varied from one month to 30 months. About one-half had been homeless more than once. Their ages ranged from 17 to 82 years old. Racially, they were 50

"Most homeless men are in a lot of pain and want to get out of the lifestyle ... not all can be helped, but some can."

— Gary Morse

percent white, 45.1 percent black and 4.9 percent other minorities. Most were unemployed, although many had stable work histories prior to their homelessness. Most were either unskilled or semi-skilled.

How does it feel to be a homeless man? "Some of the people are resentful," Morse said. "What strikes me most is their alienation. They vacillate between wanting help and a better life and feelings of mistrust. There are a lot of feelings of powerlessness and conflict both in themselves and with respect to other people."

"The mortality rate of homeless men is really high," Morse said. "As a group, they die at a

much greater rate than the housed population." Suicidal thoughts are not uncommon among the homeless, due to their sense of hopelessness and despair.

"Some homeless men feel responsibility for their homelessness, while others externalize it, looking for someone or something else to blame," Morse said. Different men have different ways of coping, just like everyone else, he said.

The primary objective of Morse's research was to assess the needs of the homeless men. Their basic needs, he found, were for jobs and housing. In addition to those, he found a need for job training, personal safety, mental health treatment, treatment for alcoholism, medical treatment and social support.

"Altogether, 72 percent of the people had either a serious mental, drinking or physical problem or some combination of those," Morse said. "Usually those problems existed before their homelessness, which would indicate their needs were not being adequately met by existing social and health services. One problem is that if you don't have an address it is difficult to collect welfare and social security benefits," Morse said.

"A lot of these people would be better off if you tried to create places for them," he added. "This would give them a place to live, some work and income, a sense of belonging with the people they live with, and a sense of living a more valued and meaningful life—something I think that most people want whether they are homeless or not. But something like that doesn't come about without planning and developing it first."

Although the State Mental Health Department had plans to provide services that would have been effective, budget cuts last October prevented carrying them out.

Rising unemployment has contributed to a rise in homelessness. "When the government cuts social security and social welfare programs and does not provide job programs, more people become homeless," Morse said.

Homeless men (and women) need a variety of services—services which cannot all be provided by any one agency. Despite the current situation, Morse believes there is some reason for optimism. Interest in the homeless has grown in recent years—the national government has shown more interest and churches have responded by helping to house the homeless and by providing job programs for them. Hopefully, interest will continue to grow.

It is easy to dwell on the negative images of the homeless, but the strength and courage of anyone who still tries to go on in the face of such pain has to be admired. "Not all of them can be helped," Morse said, "but some of them can."

Something comes from nothing

Whatever happened to the human race? Remember when we used to discuss such lofty concepts as human rights and "Power to the people"? Lately it seems that everyone is running in his or her own private race, trying desperately to establish his or her own event in the Olympics of life.

It is most evident to me here at UMSL. There are so many ways to be a student here. You can be a collegiate anti-communist, a black collegiate or a woman collegiate. If you want, you can be a Greek student or even a Bible student.

It struck me that all of these groups are just a little ridiculous. For now we will bypass the Collegiate Anti-Communists. They are so undeserving that they deserve a column all to themselves.

The thing that really makes me wonder is the Women's Center. For those of you that don't know, the Women's Center is located in Benton Hall. Hmmm ... Benton Hall. Silly me, all these years thinking that a woman's center was someplace entirely different. Send all complaints in care of the Current offices, please.

Now the Greeks really make me laugh. I never trust groups that are so embarrassed about what they do that they won't use the English alphabet and instead use the Greek alphabet which

sounds Chinese. And speaking of that, what do they do anyway?

By far, though, my favorite groups are all the campus ministries and Bible study groups. I have nothing against the Bible. I

refractions
Gary Belsky

will admit that at first I was opposed to bringing the Bible onto the college campus. But then I realized there is nothing wrong with a little academic contribution to Biblical thought. Not that I'm an English major but maybe, I thought, they brought the Bible onto campus for a little rewrite. And, as I told my friend Jason, I always try to be accommodating. So here for the first time in an UMSL newspaper is a new version of creation, by Gary Belsky. With many thanks to God who made it all possible.

In the Beginning

First there was nothing. Nothing is when there's an absence of something. Nothing. Something is when there's an absence of nothing. Anyway, first there was nothing. And then there was God. Now that was something.

Now after a while God got bored with all of this and he decided to do something about all of this nothing.

So first God created the earth and he put all sorts of green stuff on it. (Plants, not money.) Soon however the earth started to get crowded with all of this green stuff growing so God created animals to eat some of it. Adam, the first man, followed the animals. Eve, the first woman, followed Adam. Soon Adam began following Eve, and Cain and Abel followed.

Now this Abel, he was a sheep herder and his brother Cain was a farmer. They were both very successful and wanted to thank God. Abel gave God sheep and Cain gave God crops. Well, Abel was able to please God but Cain wasn't able. So Cain decided to kill Abel and this Cain was able to do. God, of course, was angry and he asked Cain if he was able to explain the death of Abel. Once again Cain wasn't able. So God kicked him out and ran an ad for sheep herders and farmers, asking of course for Abel-bodied men. (To be continued, when we will find out why there were two gophers and no Doc on Noah's Love Boat.)

I hope this has been of some help to these Bible study groups who are caught in the torment between the different creationist theories. For years we've wondered who started it all. Now we know.

I did.

IN THE SUMMIT LOUNGE!

Singers to perform at Art Museum

Three new choral compositions by Bruce Vantine, assistant professor of music at UMSL, will be performed during a concert by UMSL's University Singers on Wednesday, March 2 at 8:15 p.m. at the St. Louis Art Museum in Forest Park.

The concert, which marks the start of the group's annual six-state tour, also will feature music appropriate to the Lenten and Easter seasons. The select 43-voice choir performs a variety of choral literature from the 16th century to the present.

The program will begin with the traditional sound of Volckmar Leisring's "Ye Sons and Daughters," and "Alleluia!" followed by three selections from J.S. Bach: "O Death, None Could Subdue Thee," "A Lamb Goes Uncomplaining Forth," and "Death, I Do Not Fear Thee." A reprise of Leisring's "Alleluia!" brings this segment to a close.

Vantine's newest composition, "Of Tide and Time," will be featured in a set of works by contemporary American composers. This modern, atonal piece will be paired with "Oread" by Paul Fetler of the University of Minnesota, to provide two contrasting portraits of the sea. Rounding out the contemporary portion of the program will be William Schuman's "Prelude for Voices."

Following the intermission, the University Singers will perform "Processional for the Season of Light," another recent work by Vantine. The lyrics of this bright and rhythmic piece are based on the book of Isaiah.

The group will then sing Mendelssohn's "How Lovely are the Messengers," and Haydn's "Gloria" and "Agnus Dei."

A selection of folk tunes, spirituals and carols will conclude the evening's program. One of the carols is Vantine's composition, "Let Bells Ring!" Other selections include the American folk song, "Shenandoah," the Norwegian folk tune, "A Maiden is in a Ring," a Polish carol, "Infant Holy, Infant Lowly," and the American spiritual, "Angels Rolled de Stone Away."

This appearance of the University Singers marks the first time a group from UMSL has been the featured attraction at the Art Museum. The concert is being supported by the UMSL Alumni Association.

The choir will tour the mid-west March 3 through 8, performing in Illinois, Wisconsin, Minnesota, Iowa and North Dakota. At one stop, in Minneapolis, the group's performance at the new Lutheran Brotherhood Auditorium will be recorded for possible use in a future album. Last year, the University Singers recorded its first album in Memphis, Tenn., while on tour.

Bruce Vantine has been director of the University Singers since 1980. He holds a bachelor of music degree from Concordia College, Moorhead, Minn.; and a master of music degree from Michigan State University, East Lansing. He received the doctor of musical arts in choral performance from the University of Illinois, Champaign-Urbana. In addition to his work at UMSL, he directs the choir of St. Barnabas Episcopal Church in Florissant, and has completed several commissioned works for church choirs.

Tickets to the March 2 concert are \$4. Special rates are available for large groups. For information or to order tickets, call the UMSL music department at 553-5980.

They've got the (English) Beat

SPECIAL SERVICE: (bottom row, left to right) Andy Cox, Wesley Magoogan, Everett Morton; (middle row) David Wakeling, David Steele; (top row) Ranking Roger and Dave Blockhead are seven members of the eight-man band, The English Beat. 54-year-old sax player Saxa is not pictured.

The English Beat
Special Beat Service.
I.R.S. Records

★★★★★

The English Beat produces, undoubtedly, some of the happiest and most infectious music around.

The Beat combines much of what is important in modern pop music, taking full advantage of its eight members' talent and interests. At the same time, the band takes a specific unmistakable direction, obviously knowing what its strengths are.

And the strengths on this, its third album, are many.

Very evident are the Beat's quite appealing songs. "Save It For Later," for example, had received much Music Television airplay (cable-play?); the song's strength and pop accessibility make it very confusing why the song isn't played more often on, say, KHTR.

The sheer musical happiness in "Save It For Later" is quite contagious, but the track is only one of a number of strong songs on "Special Beat Service."

Every track, in fact, is strong, one of the reasons this record is worth five stars and definitely your attention.

The English Beat combines pop, ska and jazz influences to create its own substantial style. David Wakeling's vocals, for example, may be familiar from "Save It For Later," but Ranking Roger's "toasting" (sort of ska rapping) makes the Beat's vocal sound very special.

Roger shines particularly on "Pato and Roger (Ago Talk)," a track he co-produced.

Bob Sargeant, producer of the first two Beat albums and the first Haircut One Hundred effort, produced the remaining songs on the 12-track "Special Beat Service."

Sargeant has proved himself quite capable with this sort of uplifting music; his presence adds much to the record. And, yet, Sargeant avoids gaudy production effects on his records, letting the music take center stage.

In addition to the joyous strength of its music, the band takes on serious issues, as well. Reading a Beat lyrics sheet can, in fact, be downright depressing.

music

Frank Russell

Take "Sugar and Stress," for example. "The world is upside down," the song goes. "The rights and wrongs don't get much wronger." And those lyrics are much more subtle than those on the group's previous album, "Wha'ppen?" an equally excellent effort, by the way.

And yet, the Beat doesn't fall into the attitude of many of its punk predecessors.

The Beat's message, basically, is: Despite the deplorable shape of the rest of the world, one's responsibility is to do the best to improve the shape of his or her own personal corner.

"Someone just smiled for no special reason," Wakeling sings in "Ackee 1 2 3." "It looks like the smile's come back into season. It's so easy."

The English Beat will perform March 15 at Washington University's Graham Chapel. Tickets are now available at the Edison Theatre box office. Go see them.

Trio
Trio
Mercury Records
★★★★

"Remember your audience," my section editor tells me, questioning, I suppose, whether or not a review of this six-song EP is the most appropriate use of this space.

But I've been getting quite bored reviewing Billy Joel and the Rolling Stones; we need something challenging, something different. The German art band Trio is just that.

And, in all justice, if Men At Work's "Down Under" can be a No. 1 single, why can't "Da Da Da I don't love you you don't love me aha aha aha?" In fact, in both England and Germany it was, at least on the dance charts.

The six-and-a-half minute track makes much use of the Casio VL-tone, an instrument so simple and inexpensive that I even have one. Even so, Trio's effect on the song is definitely not amateurish.

The remaining five songs are not as much danceable as they are experimental. Trio sounds, in fact, very much like the local art-rock group Wax Theatrics.

It's notable, however, that the West German band creates its sound with only three members.

Correction

In the editor's note to the story "Healthier body can mean happier life" in the Feb. 17 issue, it was incorrectly stated that Bruce Clark is an assistant professor of athletics. He is a member of the physical education department, not athletics.

The Current regrets the error.

Bazaar, play to conclude black history month

Sharon Kubatzky
features/arts editor

An African art bazaar and a play depicting the life of Malcolm X will cap off a month of black history events at UMSL.

Black History Month, sponsored at UMSL by the Associated Black Collegians, is the culmination of a semester of planning by ABC program chairwoman Priscilla Dowden. Events included films, slide presentations, panel

discussions and numerous lectures.

The art bazaar, featuring local artists, will take place on Friday from 9 a.m. to 3 p.m. in the University Center lobby. Art, jewelry and clothing will be displayed and sold.

The finale of the month's program will be a play titled "El Hajj Malik Shabazz: The Life of Malcolm X." The Sudan Illustrators will present the play on Monday, Feb. 28, at 8 p.m. in the

Summit lounge. Admission is free.

Dowden said the response to the month's events has been positive. She estimated attendance at the opening lecture, featuring Louis Farrakhan from the nation of Islam, at close to 600. "Students have been turning out pretty well," she said.

Black history has usually been recognized at UMSL during a weeklong program. Dowden said she felt, however, that since

nationally a black history month is celebrated, the same would be appropriate for UMSL.

"A week wasn't long enough to present the kind of program we wanted to," she said. "This way more people could see it."

This monthlong event, along with Kwanzaa, a similar program held last semester, has been the group's largest project this year. Dowden said the events this month have cost approximately \$4,000 to present and are paid for by student activities fees.

Dowden said that Kwanzaa and

the past month have served similar purposes.

"Kwanzaa enlightened a lot of other ethnic groups to black culture," she said. "This month, I wanted to expose the black talent in the St. Louis area and enlighten people of black history."

An African history display was also planned for last week, but due to a snag in plans, had to be postponed. Dowden said the display will be rescheduled in March and will be set up in the University Center lobby.

Classes

from page 7

"The program dealt with interesting people in St. Louis, gave an in-depth look at pictures in the Art Museum and showed landmarks in St. Louis," Nelson said. "Kathy Corbitt was very knowledgeable on the topics as well as interesting."

Nelson also enrolled in a basic computer course. She said that she achieved "personal enrichment, met new people, shared views and participated in continual growing" through the non-credit programs in which she was enrolled.

People who take part in certain non-credit courses that have been approved by the university for Continuing Education units may be awarded one unit for each 10 hours of class instruction complete. CEUs are computerized certificates that give recognition for the efforts of one's self-improvement through continuing-education activities.

According to Klostermann,

people in some professions such as medicine, optometry and law are required to obtain CEUs before they may renew their licenses. CEUs that are collected are placed in a permanent record at the university. CEUs also are nationwide and are recognized from coast to coast as a proof of continuing efforts in education.

"Credit courses offer educational opportunity to the population in the metropolitan area far from the UMSL campus," Renee Damron, Senior Continuing Education Coordinator for credit courses, explained. Most of the credit courses are held off campus at several schools, hospitals and centers. According to Damron, the following are where some courses are held: UMSL Lindbergh (Lindbergh High School); Hollenbeck Junior High School, St. Charles; Lafayette High School, Rockwood School District; Truman High School, Independence, Mo.; Jewish Center for the Aged; Mineral Area

College, Flat River, Mo; and Missouri Cooperative Extension, South Brentwood.

Damron added that the people in credit courses are either re-entering students or homemakers who want to stay in their neighborhoods to continue education. Having the courses outside the UMSL campus, "builds up a harmonious relationship between the school and public by offering classes closer to the public," she said.

Credit courses are offered in economics, education, English, philosophy and psychology. Cost per credit hour is \$52 for graduate students and \$47.25 for all others.

Nelson added her regret that not enough people show their interest in the Continuing Education-Extension programs.

"There is so much wealth in these programs, it's a shame they are not looked into, because there is something of interest for everyone," she said.

Personals

Todd (TTKA). If I told you that you have a great body would you hold it against me?—or better yet—just give me a hickey.

An Admirer Blue eyes, We really liked your Valentine card! But we're still waiting for our wine tasting party. We want to be dazzled by your townhouse before you move. You do keep improving with age but don't make us wait too long!

The Turtles from Asian

Rick E. Happy Belated birthday! (Is this obscene enough for you?) Beth

Wally, We're going hunting. Do you want to come along? There's not many people at the zoo these days so no one will get in our way! Did you know the zoo is the best place to go hunting?

To the Forceful Two: Thanks for the classified! It was really sweet of you Darsi Holland and Susan Luedde. Now you've had your names in the Current too!

Guess Who?

Button's lover, Thanks for the note last week and the weekend!!! Was it a sample of things to come? The Founder's Day Dance for example? I certainly hope so—I'm totally attracted to you!!! Love, Buttons

Gary Ault, I think you're wonderful! Not only do you set my heart afire, sometimes you melt the elastic in my underwear!

Hot for you!

Slowbo, Thanks for the Valentine classified. I'd really like to be your Valentine—it may not pay much but the fringe benefits are excellent!

Love Buttons

Randy & Melissa, finally 1 plus 1 equal 3 (in September?) Congratulations and Good Luck!!!

To the A #1 Pikes. Happy Founders Day.

Love Ya
Valerie

Attention All Students: Jeanette Bax and Marilyn Brand are both 21 years old this week.

Happy Birthday Mom
In D.Z. Love
A. and V.

Scoot - R. Where did you go Saturday Night?

Muscles: Have you taken your medicine lately? I hope not! (not that the medicine would do any good!) Love, Mick

I am a 20 year old male caucasian, and I am looking for a beautiful person of the female persuasion. I am 5'11" tall, and weigh 140 pounds. I have brown hair and 2 hazel eyes. I have a fairly good job, and I am a pre-law full time sophomore student here at UMSL. I am looking for a female who is fun-loving, personable, and understanding, and willing to date a total nutcase. I am looking forward to your response in next week's Current. If interested at all, please respond quickly.

MJR

Will the good looking "man" in my evening Data Processing class who drives a pickup and always wears a leather jacket help me with my input/output.

Desperately: IBM

Dear Mindy and Seema, I know when something's wrong, I can always count on the both of you to help me straighten things out. Besides there are other "fish" in the sea.

Grateful

Woody, I hope this week was better than last week. I hate to see you down and out. Be happy and smile cutie.

Love Ya,
Chicken

To Donna: We are very interested in your prisoner rehabilitation program. B.D. and S.M. are enjoyed, discretion is a must. Hold me, control me, love me, make me bleed. P.S. Don't forget the handcuffs.

Stinger

To the cute guy named Craig in my evening Financial Accounting class. I love to Do Lots of Stuff With Leather.

Signed with
hopeful affection

HAPPY BIRTHDAY TO ALL DELTA ZETAS BORN IN FEBRUARY: Shari Deckert, Barb Luedde, Joan Wild-eisen, Barb Meyer, Jeanette Bax, Valerie Langford, Alita Quire and Marilyn Brand.

The deadline for submitting ads is Friday, 3 p.m.

ALL IN THE FAMILY: Carolyn Sites Fruchtman (left) and Efrim Fruchtman, professors of music at Memphis State University, will present a concert of early music on harpsichord and viola da gamba at UMSL on March 10.

Guest artists to present recital of early music works

Two guest artists from Memphis, Tenn., will present a chamber music recital Thursday, March 10, at UMSL. The program will begin at 8 p.m. at the Education Auditorium on the South (Marillac) campus.

The recital will feature Efrim Fruchtman on viola da gamba, and Caroline Sites Fruchtman on harpsichord. The program will

include works of early music by C.F. Abel, J.S. Bach, J.C. Bach, G.P. Telemann, Louis Caix de Herveois, and G.F. Handel.

Both professors of music at Memphis State University, the Fruchtmans have collaborated in performances of music for viola da gamba and harpsichord for the past 23 years. In addition to presenting concerts on major

campuses throughout the United States, they have directed and performed at a workshop in early music at San Miguel de Allende, Mexico. Recently they were awarded joint Fulbright lectureships to New Zealand.

The recital at UMSL is open to the public free of charge. For additional information, call 553-5980.

Thespian perspectives offered in 'Backstage at the Theatre' course

Directors, designers and actors will explain the inner workings of the theater this semester, as UMSL once again presents "Backstage at the Theatre."

The course will meet on Tuesdays, from March 29 to May 3, from 7 to 9 p.m. at Neiman Marcus in Plaza Frontenac. Registration is \$45 per person or \$65 per couple.

Fontaine Syer, artistic director of the Theatre Project Company and artist-in-residence at UMSL, will be the principal instructor. She will be assisted by guest speakers who will give

their perspectives on the theater. The course will focus on 20th century American theater.

For more information call Clark Hickman, Continuing Education-Extension, at 553-5961.

University Players to present 'Midsummer Night's Dream'

The University Players will present William Shakespeare's "A Midsummer Night's Dream" March 3, 4, 5 and 6.

The cast includes Greg Barnes as Lysander, Maureen Corbett as Hermia, Ray Fanning as Oberon, Jan Ryder as Helena, Tom Simmons as Theseus and Pam

Uruburu as Titania. The play is directed by David Novack of the Theatre Project Company.

Tickets are \$2 for the general public and \$1 for students with an UMSL ID. The curtain will rise at 8 p.m. each night; the play will be presented in the Benton Hall Theatre, 105 Benton Hall.

How to follow Fellini.

Talk it over, over a cup of Orange Cappuccino. Creamy-rich, with an orange twist, it's a little bit of *la dolce vita*. And it's just one of six deliciously different flavors from General Foods® International Coffees.

Monday

● **College Republicans** hold a get-acquainted meeting at 1 p.m. at 207 SSB.

● **Peer Counseling** sponsors a free interviewing skills workshop from 3 to 4:30 p.m. in the Counseling Center, 427 SSB. Call 553-5711 to register.

● **Rita Bergoudian of the UMSL modern foreign languages department** speaks on "Modern Brazilian Literature: The Coming of Age" at 2:15 p.m. in the department's Multi-Media Room, 110 Clark Hall.

● **Debbie Munro of the Planned Parenthood Association** of St. Louis speaks on the topic "Know Thyself: Health and Contraceptive Issues for Women" at noon in the Women's Center, 107A Benton Hall.

● **George Stanley of the Washington University chemistry department** speaks on "The Template Synthesis of Transition Metal Clusters" at 4 p.m. at 120 Benton Hall. Coffee is served before the seminar at 3:30 p.m.

1

Tuesday

● **Peer Counseling** offers a free career exploration workshop for three consecutive Tuesdays, meeting from 2 to 3 p.m. in the Counseling Center, 427 SSB. Call 553-5711 to register.

● **Rumanian exile Marian Orelt** speaks on "Parallels Between Communism and Nazism" in a program sponsored by the Collegiate Anti-Communists at 7:30 p.m. at 101 J.C. Penney Building.

● **An exhibit of photographs by John Bennett** of the Washington University anthropology department, "An Anthropologist's Photographs," is on view starting today in the Center for Metropolitan Studies, 362 SSB, through March 31.

● **Student candidates for the University Senate** must file their applications by today in the Office of Student Affairs, 301 Woods Hall.

2

Wednesday

● **Peer Counseling** sponsors a free career exploration workshop for three consecutive Wednesdays, meeting from 2 to 3 p.m. in the Counseling Center, 427 SSB. Call 553-5711 to register.

● **The University Singers,** under the direction of Bruce Vantine of the UMSL music department, perform at 8:15 p.m. at the St. Louis Art Museum Auditorium.

● **Neils Kr. Rasmussen of the Institute of Social Medicine,** University of Copenhagen, speaks on "Pregnancy Resolution in Denmark: The Danish Experience with Liberalized Abortion" at 1 p.m. in the McDonnell Conference Room, 331 SSB.

● **"Wednesday Noon Live"** presents live music from 11 a.m. to 1 p.m. in the University Center Student Lounge or on the U. Center patio if weather permits.

● **Math Club** meets at 2:30 p.m. at 527 Clark Hall. Refreshments are to be served.

● **Molly Reinert and Nona Bonheimer,** investment brokers for Prudential Bache Securities, speak on "Financial Planning for Women" at noon in the Women's Center, 107A Benton Hall.

3

Thursday

● **Intramural hoc-soc.** All teams must register by today in the Intramural Sports Office, 362 Mark Twain Building.

Play for men's, women's and coed teams is Monday and Wednesday at 6:30 p.m.

at the movies

Henry Winkler is Chuck, an ex-stock broker who finds himself working with the dead to make a living. Michael Keaton is Bill, Chuck's rather strange new friend. Together, Chuck and Bill decide to turn their place of employment, the New York City Morgue, into a lucrative prostitution ring.

"Night Shift" is directed by 28-year-old Ben Howard. Brian Grazer

produces. The original screenplay is by Lowell Ganz and Babaloo Mandel.

—Steve Klearman

"Nightshift" is presented at 7:30 p.m. and 10 p.m. Friday and Saturday at 101 Stadler Hall. Admission is \$1 with an UMSL student ID and \$1.50 for general admission. Students may bring one guest at the reduced price.

Rivermen stretch streak to four; look forward to getting into MIAA playoff

Kyle Muldrow
reporter

Earlier this season, the UMSL men's basketball team was suffering from erratic play. Coach Rich Meckfessel blamed a lack of confidence for the slump and said that the Rivermen needed a winning streak to regain that confidence.

If the last two weeks are any indication, confidence is not a problem any more. The Rivermen now are on a four-game tear, after winning two cliffhangers last week.

The first nail-biter was last Wednesday night, when the Rivermen traveled to Jefferson City to meet Lincoln University. The Blue Tigers were out to avenge their 48-46 loss to UMSL back on Jan. 26. At the start of the game, the Rivermen came out playing conservative, in contrast to their run-and-gun style that had given them their victory over Quincy College.

"We did that for two reasons," said Meckfessel. "One was that we were playing on the road. The other was that Lincoln matches up well, man for man, with us."

Lincoln matched up so well that it forced the game into overtime. But the Rivermen took over from there and won, 74-68. Carlos Smith led the way with 22 points. Kurt Berg chipped in with 10 rebounds.

Now for the big game. On Saturday night, the Northwest Missouri State University Bearcats came into town. They boasted a 16-8 record (6-3 in conference, good for third), and had one of the Missouri Intercollegiate Athletic Association's top scorers in Victor Coleman (19.5 points per game). Also, Northwest had

edged the Rivermen, 75-72, back on Jan. 29.

So another big rematch got underway. The first few minutes were even. Then the Rivermen caught fire. Leading the way was sophomore forward Kurt Jacob. Jacob has a knack for coming in

MIAA standings as of Feb. 22

TEAM	GAMES	BEHIND
Southeast Mo.	8-2	--
Central Mo.	8-3	½
Northwest Mo.	6-4	2
UMSL	5-5	3
Northeast Mo.	4-6	4
Mo. Rolla	3-7	5
Lincoln	2-9	6½

and unexpectedly generating instant offense. And this time was no exception. He quickly tossed in eight points in the first half. With seven minutes to go in the half, UMSL opened up an 11-point lead. But then the momentum began to swing towards the Bearcats. Victor Coleman, who had been shut down by UMSL's man-to-man defense, now started to connect on his shots, as did guards Rick Owens and Major Craig. The Rivermen lead was down to three at halftime, 33-30.

UMSL came right out in the second half with an aggressive attack that got them back into the swing. With seven minutes to go, they held an eight-point lead. But the Bearcats were not finished yet. They kept pressing the Rivermen with a tough man-to-man full court press that was now forcing turnovers. The big three for the Bearcats (Coleman, Owens, and Craig) were hot again on the offensive side. With 4

minutes, 26 seconds left, the Bearcats took the lead, 61-59.

Now the pressure was really on the Rivermen. A loss could drop them out of fourth place in the conference, as well as a playoff spot. They badly needed a basket on their next possession. Who got the basket? Who else? Jacob, who had the hot hand in the first half, sank a jumper to tie the game at 61-61.

The teams then traded baskets to up the score to 65-65. There were 2 minutes, 30 seconds left on the clock. UMSL had the ball and held it in the Bearcats' half of the court. It soon became obvious that the Rivermen were going for the last shot. They then called a time out with 24 seconds left to play.

"We didn't decide to go for the last shot until there was a minute left," said Meckfessel. "Then, we tried to get the ball inside to Vic [Jordan], who was being guarded by Craig, who had four fouls. But, when we couldn't get the ball inside, we decided to go for the last shot," according to Meckfessel.

The stage was set. The crowd was on its feet. The Rivermen passed the ball around the top of the key. Carlos Smith had it there with 10 seconds left. Then, he started to go left. Five seconds left. Smith dribbles. Four. Smith dribbles. Three. He's still dribbling. The crowd is thinking, "shoot!" Two seconds. Smith shoots and—the ball hits the rim. But wait! All of the sudden, out of nowhere comes Ron Porter. The freshman got his hand on the ball just as the buzzer went off, then put it up and—the ball rolls in! The crowd explodes. UMSL wins the game, 67-65.

Sharon Kubatzky

HIGH-PERCENTAGE SHOT: Victor Jordan shows his form here against Northwest Missouri State University. Jordan leads the Missouri Intercollegiate Athletic Association in field goal percentage. The Rivermen defeated the Bearcats, 67-65. Reggie Clabon watches Jordan shoot.

A balanced scoring attack was the key to the memorable victory. Smith was tops for the Rivermen with 13 points, followed by Porter and Jordan with 12, while Jacob tossed in 11.

If a Player of the Week for UMSL award were given out, Jordan would be in high contention for it. "Vic played well in both games," said Meckfessel. "He

was 6-for-6 from the field against Lincoln and 5-for-6 against Northwest."

And, of course, we can't leave out Kurt Jacob. "Kurt played an excellent game. He moved well with the big men up and down the court."

See "Rivermen," page 14

Meckfessel deserves MIAA coach of the year honor

Jeff Kuchno
editor

Here's my vote for Rich Meckfessel for Missouri Intercollegiate Athletic Association basketball Coach of the Year.

Not that my vote counts for anything, but someone needs to

prime candidate? First, the obvious. UMSL was 14-11 and in fourth place in the MIAA going into last night's game against Northeast Missouri State. A win last night would have clinched a spot in the MIAA postseason tournament for the Rivermen, who entered the season with only one player (Reggie Clabon) who had started previously on a regular basis.

Second, there's the competition. By the end of the season, UMSL will have played at least nine games against teams that are presently ranked in the top 20 nationally in their respective divisions. And with the exception of Quincy College (One 76-56 loss last December), UMSL has been competitive in just about every game it has played.

Finally, there's the way Meckfessel has handled the team. He has been uncommonly honest with his players, letting them know at the beginning of the season what their role was and exactly what they needed to do to help the team. He made it clear from the start that he wasn't going to try and keep players happy by giving them equal amounts of playing time, but as it has turned out, every player has

Rich Meckfessel ...
... coach of the year?

contributed significantly.

"This has been one of the most enjoyable seasons I've ever had as a coach, because of the attitude of the players," Meckfessel said recently. "We've accomplished a lot because the players have worked hard. The players are better than people gave them credit for."

All year Meckfessel has stressed hard work and intelligent play. He admits his players

are not the most talented in the league, but the team has been competitive because Meckfessel has helped the players play up to their potential. Getting the most out of his players is an important goal for any coach. Meckfessel has done this about as well as anyone could have expected.

Of course, there were a few rough spots early in the season. Any team that features a heavy influx of new players is bound to experience growing pains. That UMSL survived the first half of the season was an accomplishment in itself.

Since league play began last month, UMSL has improved tremendously. The new players have asserted themselves as have many of the returning lettermen, and the team is now playing as well as any other school in the conference. Going into last night's game, UMSL had won its last five contests.

Guards Carlos Smith and Reggie Clabon have been outstanding all season, and players such as Kurt Berg, Ron Porter and Victor Jordan have improved immensely since the season opener.

Porter, in particular, has been a welcome addition to the team. Meckfessel brought the prized

recruit from University City along slowly in the first few months of the season, hoping that Porter would eventually gain the necessary confidence to compete on the college level. Since January, Porter has become a starter and is averaging 6.4 points and a team-high 6.2 rebounds per game. He also leads the team with 27 blocked shots.

Every move Meckfessel has made has been in the best interest of the team. Meckfessel, who has remained on an even keel in a season that has been filled with plenty of ups and downs, has laid the foundation for an outstanding Division 2 basketball program.

In 14 seasons at Morris Harvey College (now the University of Charleston), Meckfessel's teams compiled a record of 250-168, won three conference championships, two conference tournament championships and participated in three national tournaments.

Meckfessel should bring the same type of success to UMSL. After all, he is respected. He is a proven talent as a head coach. And he is definitely the most logical candidate for MIAA Coach of the Year for 1982-83.

sports comment

acknowledge the marvelous job UMSL's first-year head mentor has done this season. He came to UMSL only two months before the season started, took a group of unheralded players and molded them into a winning team. Considering UMSL was picked to finish at the bottom of the MIAA standings, that's quite an accomplishment.

The seven MIAA coaches will meet at UMSL Monday to determine the all-conference teams, most valuable player and coach of the year. If Meckfessel isn't tabbed for the latter honor, consider it one of the most outlandish crimes of the decade.

What makes Meckfessel such a

UMSL skaters knock off SLU; win league title

Bob Chitwood
reporter

UMSL has a champion. The champion is the Rivermen hockey team which captured the first St. Louis College Hockey League championship and some respect from the Saint Louis University Billikens. The Rivermen outhit, outhustled and outlasted their cross-town rivals 3-1 in a suspenseful battle Sunday evening at the Dellwood Ice Arena.

The Billikens were a confident bunch. They had finished on top of the regular season standings winning 12 of 15 contests. Runner-up UMSL finished five points back, but handed the blue and silver their only two losses.

Still the SLU crew figured that the championship game would be easy. They even planned a little victory celebration for after the game. As it turned out, they should have done a little more practicing and a little less planning.

UMSL wasn't so cocky. "We knew it would be a tough game," admitted Riverman Bill Karides. UMSL coach and mastermind Ron Gulley assessed his team's play. "Real determination," he said. He added, "I think they (SLU) came out and took us lightly."

Maybe so, but the Bills knew they were in for a ride after the first five minutes.

SLU came out skating and passing, forcing the action into the UMSL zone. Goalie Mark Starr and the Rivermen defense were equal to the challenge.

Starr responded with a superhuman effort. The slick UMSL keeper handled glove saves and stick saves with all the finesse and coolness of a Riverboat gambler. Starr's performance was the centerpiece of the Rivermen victory.

Starr had plenty of help though in the form of a tenacious defense. UMSL defenders dove to

muffle SLU shots. The red and gold slammed enemy skaters into the boards, harassed them around the net, and upended the flying Billikens at the blue line. Before long SLU skaters along the boards were keeping their heads up, being more concerned about punishing checks than bouncing pucks.

"We intimidated them" felt Starr. "Our guys really took their game plan away." Meanwhile the Rivermen's game plan according to defenseman Craig Gulley was "to score a lot and often."

SLU outshot UMSL 10-5, but it was the Rivermen who led after the first period. UMSL jumped on top early in the period Karides on left wing passed the puck to defenseman Ken Whitbrodt at the right point. Whitbrodt blurred a shot which winger Jim Demos deflected into the net past the helpless goalie.

At 3 minutes, 37 seconds of the second period the home skaters got a break. After a flurry of SLU chances, defenseman Eric Amundson appeared to have fallen on the puck in front of the net. The referee blew a quick whistle and as Amundson turned over, the puck came out. It was shot into the net, but the score was disallowed because play had been whistled dead.

Starr continued to make big save after big save including one on Billiken Mark Diedrich. Diedrich skated right in on Starr at 11:55 of the second and shot from handshake range but was thwarted on a pad save.

The period was scoreless with the UMSL puckhandlers maintaining their 1-0 edge.

The SLU crew finally scored five minutes into the final period. With both teams fighting for control of the puck at the UMSL blue line; Paul Jasso, the league's top scorer, had set up shop in the Rivermen crease. The Bills got control, Jasso got the

Sharon Kubatzky

STAR OF THE GAME: UMSL goalie Mark Starr makes a pad save against Saint Louis University. Starr stopped 25 of 26 shots as UMSL won the first St. Louis Collegiate Hockey League championship by beating the Billikens 3-1.

puck, and he flipped the rubber biscuit into the top of the goal.

Jasso won that battle, but ultimately lost the war. Amundson shadowed and hounded SLU's explosive scorer virtually taking him out of the offense. By the end of the evening Jasso was "crying," according to Amundson.

The 1-1 deadlock lasted exactly one minute. With the red and gold on the power play, Karides let one go from the left wing and scored on his own rebound. Demos was credited with the assist.

Concern began to show in the Bill's play. "We frustrated them," said Demos proudly. "They stopped playing hockey," noted Karides of the visitors third period panic.

The blue and silver squad had three excellent opportunities in front of the net in the final five minutes. Ed Hoechstebach had two of the chances from point blank range. The first shot Starr rejected; the second one Hoechstebach shot wide. He reacted by bending over and shaking his head.

SLU pulled its goalie with 52 seconds left looking for one final rush. For 45 seconds the Bills controlled the puck without driving it home. Finally, with seven ticks left on the clock, UMSL's Rick Peterson fired an unassisted goal into the empty net. The underdog Rivermen had spoiled SLU's best laid plans, not to mention their party plans.

After the game, words like "team effort," "solid team effort," and "fantastic job" were floating around the locker room describing the Rivermen's accomplishments. "Everyone picked it up when they had to," said an exuberant Karides.

To get to the finals UMSL faced a feisty Meramec Warriors squad last Thursday. The Rivermen survived a 5-4 thriller as UMSL

hero Jerry Polk scored all five red and gold tallies.

The contest had a roller-coaster finish. Meramec pulled its netkeeper with 1:01 showing on the clock and the gamble worked. Warrior Tim O'Hara fired the 4-4 equalizer past Starr with 36 seconds to go.

"Everyone was thinking OT," said Polk. But overtime wouldn't be necessary.

Gulley gained control of the puck from the faceoff. The smooth stick handling defenseman lofted the puck down the ice with Polk in hot pursuit. It should have been an easy chance for the Meramec goalie, but he failed to get down on it and it bounced over his stick and perilously towards

see "Skaters," page 16.

Rivermen

from page 13

UMSL notes: The Rivermen have raised their record to 13-11, with a conference record of 5-5... The Rivermen now are in sole possession of fourth place in the MIAA, thanks to their win over Northwest, and also because Northeast Missouri State, who was tied for fourth place, lost to Central Missouri State Saturday night... The Rivermen played the Southern Illinois University-Edwardsville Cougars at Edwardsville Monday night and closed out their home season by playing Northeast here Wednesday night... The team will play their last regular season game Saturday night against Southeast Missouri State University."

Riverwomen continue downward in MIAA

Kurt Jacob
reporter

When the UMSL women's basketball team visited Jefferson City last Wednesday to take on Lincoln University, both Coach Mike Larson and his players knew how important this game was.

If UMSL won the game, it still had a shot at the playoffs. If UMSL lost, it could kiss the playoffs goodbye.

Needless to say, the Riverwomen had plenty of incentive for this game.

Behind the play of seniors Sandy Moore and Karen Lauth, UMSL stayed right with the quick

Tigerettes and at the half, trailed by only five, 29-24.

In the second half, UMSL came out firing and at the midway point of the stanza, held a slim, three-point lead.

But Lincoln star forward Beverly Scott took charge and that was all she wrote for UMSL. The Riverwomen pulled within

one point at the end and had a chance to win but a last-ditch effort by Moore was no good and Lincoln came up with the victory, 63-62.

Despite the loss, Larson was behind his team 100 percent.

"I'm really pleased with the team's effort," Larson said. "Sandy (Moriarty) did a great

defensive job on Scott. That kept us in the game.

"Really, we were fortunate to play them that close in their gym. The players did what they were supposed to do to win; we just fell a little short."

See "Riverwomen," page 16

Education and basketball attract cager Ron Porter to UMSL

Curt Melchior
sports editor

Most basketball dreams start in the backyard. A youngster dreams of making a last-second game-winning shot. On Saturday night, a youngster made that dream come true.

That youngster's name is Ron Porter. He is a forward for the Rivermen basketball team. On Saturday night, Porter made what might be known as "the shot heard 'round the conference." His tap-in at the buzzer gave the Rivermen a 67-65 win over Northwest Missouri State University. The shot put UMSL in position for the fourth, and final, playoff spot in the Missouri Intercollegiate Athletic Association.

Porter said he felt good about it. "I have done it before (made game-winning shots), but it will stay in my mind. I am the youngest player on the team and the 'baby' got to tip it in," Porter said.

That is Ron Porter, the basketball player. Then there is also Ron Porter, the person. A typical day for Porter consists of "going to class, coming home, studying a bit, going to practice, eating supper, maybe watching some TV, then going to bed," according to Porter.

Porter would like to become a teacher when he finishes college.

"I would like to teach either history of physical education. I would like to do this at the high school level. I might possibly like to do some basketball coaching as well," Porter said.

Porter is an undecided major at this point. "I am undecided but I came to UMSL to get a good education," according to Porter. "I thought college would be harder than it is. I also thought it would be more time-consuming. The only time that school is really time-consuming is when there is a test or final examination coming up," Porter said.

Porter sees one difference between life at UMSL and at University City High School, from which he graduated last year. "There are no dorms here at UMSL. UMSL would be better if it had some dorms here," according to Porter. He does remember University City, though. "The counselors there would get a schedule of courses out and ask you what you wanted to take. They really treat you nice," Porter said.

Head coach Rich Meckfessel had this to say about Porter. "Ron has almost unlimited potential. He is a nice young man and has raised his work level since starting practice in November."

Basketball, just like any other sport, requires much practice. "I stress my outside shot and Coach

emphasizes defense in practices. If you have good defense, then it will motivate the offense. I work on my outside shot the most during practice," he said.

Porter wants to rebound, more than anything else, when he is on the basketball court. "I like to rebound. We're a small team and this is one way that I can help the team out. In basketball, concentration is the main thing and that (concentration) is what I need to work on," Porter said.

As far as life off the court goes, Porter would like to work on one thing. "I would like to get closer to the students. If we can get more students to come to the basketball games, then more people might recognize me. Then if they come up to me on campus, I can hold a conversation with them. I can get closer to the students in this way," according to Porter.

Porter comes from a small family (one brother and one sister in addition to his parents). "My mom and dad make all the home games. They also made all the home games when I was at University City. They give me motivation when I am on the court," Porter said.

Porter tries to emulate Julius Erving, star forward of the Philadelphia 76'ers, when he is on the court. "Dr. J. is the best player in the world. I try to pattern myself after him. He never

Sharon Kubatzky

CELEBRATION: Ron Porter (center), Rivermen forward, is congratulated after making the game-winning shot Saturday. Reggie Clabon and Kurt Berg celebrate Porter's heroics.

argues with the officials, is a good all-around player, and can jump out of the gym," Porter said.

Saturday's was the second game-winning shot that Porter has hit this season. There is nothing comparable to it, according to Porter. "You never think it will happen to you," he said. "You see it on college games on TV but

it does not seem like it will ever happen to you."

Porter has limited interests when he is not playing basketball. "I like to watch sports on TV, go out to play pool, play cards, little things like that," Porter said.

Ron Porter—that name was in the papers all the time when he was in high school. Now that he is in college, he is not getting the ink that he used to get. Not yet.

EVEN STRAIGHT A'S CAN'T HELP IF YOU FLUNK TUITION.

Today, the toughest thing about going to college is finding the money to pay for it. But Army ROTC can help—two ways!

First, you can apply for an Army ROTC scholarship. It covers tuition, books, and supplies, and pays you up to \$1,000 each school year it's in effect.

But even if you're not a scholarship recipient, ROTC can still help with financial assistance—up to \$1,000 a year for your last two years in the program.

For more information, contact your Professor of Military Science.

ARMY ROTC. BE ALL YOU CAN BE.

Riverwomen

from page 15

Moore led all scorers with 25 points while grabbing eight rebounds and Lauth chipped in with 15 points and nine rebounds.

Last Saturday, UMSL hosted the highly touted Bearkittens from Northwest Missouri State University. By now, all hopes of UMSL making the playoffs were gone. But the Riverwomen still put up a fight.

UMSL trailed by seven at the half but they fought back to tie the game in the second half. But the Bearkittens exploded for six straight points and never looked back.

NWMS won the contest 74-63.

Despite losing, UMSL had bragging rights for star of the game. Kandy Stickrod, playing in front of numerous relatives, scored 15 points, pulled down a season-high 15 rebounds and dis- shed out seven assists.

"She was aggressive," Larson said of Stickrod. "She just made

up her mind to play well and went out and did it."

But it wasn't enough. The Riverwomen could never get the lead.

"They put a box-and-one on Sandy and shut her down," Larson said. "But Karen and Georgia (Hinson) played well."

Lauth had to be runner-up to Stickrod for player of the game as she poured in 16 points and hauled in 12 boards.

UMSL is now 9-14 overall and 2-8 in the Missouri Inter-collegiate Athletic Association. "We're not going to just sit back and wait for the season to end," Larson said. "We're going with our best players and we're going out to win."

"We're going to give it our best shot for a strong finish."

UMSL Notes: The Riverwomen hosted Northeast Missouri State last night and will end their season this Saturday night on the road as they travel to Southeast Missouri State University.

Basketball winding down; indoor soccer coming up

Ronn Tipton
reporter

For those basketball fans who saw the Missouri-Virginia basketball game Sunday afternoon, watching the Steve Stipanovich vs. Ralph Sampson contest probably was the high point of the whole college basketball season. Yet, unbeknown to them, there are some pretty good basketball matchups that take place right here at UMSL. They take place in UMSL's intramural basketball leagues.

One such matchup took place this week as the first and second place teams in the Tuesday Afternoon league, the Keggers and the Shorts, met in battle. The Keggers came into the game with a 3-0 record, the Shorts with a 2-0 slate. The Keggers had lots of height and relied on the fast break; the Shorts relied mainly on their outside shooting and a slowdown game. Who won? The Keggers did, 69-48.

Other Tuesday afternoon games which weren't quite so pivotal were the Big Dogs over the Deans 26-15 and ROTC-1

intramural report

over Devastation 57-56. The standings after four weeks of play are Keggers (4-0), Big Dogs (2-1), Shorts (2-1), ROTC-1 (2-1), Devastation (2-2), Beach Bums (0-3), and Deans (0-4).

Another good matchup coming soon will be when the United Blacks and Salt & Pepper of the Thursday afternoon league meet. Both teams are 3-0 and tied for first place in the league. Following them in the standings are Biology Club (2-1), the Butchers (1-2), FUBAR (0-3), and the Papal Bulls (0-3). The results of last Thursday's games were United Blacks over Butchers 66-49, Salt & Pepper over FUBAR 39-36, and Biology club over Papal Bulls by forfeit.

As for the Thursday night league, the A division is lead by

the Icemen (2-1) and the Fighting Irish (2-1). Behind them are FUBAR (1-1), No Names (1-1), and Latecomers (0-2). Leading the B division are the Baseball Rivermen (2-0) and Beta Alpha Psi (2-0). They are followed by the Papal Bulls (1-2), Optometry School (1-2), and Psychos (0-2). The results of the games played last Tuesday were Icemen over FUBAR 32-38, Fighting Irish downing No Names 49-40, Baseball Rivermen smashing Optometry School 76-47, and Beta Alpha Psi slipping by the Papal Bulls, 41-39.

This week's games played Tuesday night were FUBAR vs. No Names, latecomers vs. Fighting Irish, Psychos vs. Optometry School, and Beta Alpha Psi vs. the Baseball Rivermen.

Intramural notes: The deadline for turning in Hoc-Soc rosters is approaching! ... The organizational meeting of the Racquetball Club will be on this Saturday at 1 p.m. in Room 218 Mark Twain Building.

Skaters

from page 14

the Meramec net. The sprawling goalie and a defenseman chasing Polk collided. Polk stuffed in the dramatic winner with 12 secnds left to play.

UMSL coach Ron Gulley, father of defenseman Craig, gave his team an "A for effort" against the Warrior squad. The players dramatic winner with 12 seconds coach who took over the team with five games left in the regular season. Coach Gulley won seven straight including the playoff victories. He is the cerebral force behind the Riverman bench. Under Gulley the team was more organized, goals were up, and penalties were down.

The championship victory has left a good feeling among the triumphant stickhandlers. All season long the team was lacking — lacking players, lacking money, lacking fans, lacking coaching, but certainly never lacking effort.

And so it is only appropriate for a team that outhit, outhustled, outlasted and outplayed its way to the league championship, that their season was outstanding.

ELECTIONS FOR STUDENT SENATORS

Applications for Student Senators are available in the STUDENT ASSOCIATION OFFICE, 262 U. Center and OFFICE OF STUDENT AFFAIRS, 301 Woods Hall.

Applications are to be returned to the OFFICE OF STUDENT AFFAIRS, 301 Woods Hall, by TUESDAY, MARCH 1, before 5:00 p.m.
